Education

MIT Academy of Engineering, Pune **2023 – 2027**
B.Tech in Computer Science and Engineering *CGPA: 7.86 / 10.00 | Latest SGPA: 8.43 / 10.00*

Honors & Awards

- **Smart India Hackathon 2025 Winner** (Team Lead): 1st nationwide among **481** teams at India's largest government hackathon.
- **NeoBIM Global Hackathon 2026 – Runner-up** (Team Lead): 2nd place in an international construction-tech hackathon.
- **Tata Elxsi Teleport S3:** Ranked **64th in Round 2** among **18,500+** teams (top 0.35%).

Technical Skills

- **Web & App Development:** React.js, Next.js, React Native, Node.js, Express.js, FastAPI, Tailwind CSS, GraphQL, Redux/Zustand, WebSockets, Server-Side Rendering (SSR)
- **AI/ML & LLMs:** Machine Learning (Regression, Classification, Clustering, Ensembles), Deep Learning (CNN, RNN, Transformers), NLP & Word/Sentence Embeddings, Transfer Learning (Fine-Tuning), Model Evaluation Metrics (F1, Precision/Recall), RAG, Vector Databases, LangChain/LangGraph, MCP (Client-Server Architecture), Scikit-learn, PyTorch, TensorFlow, Google OR-Tools
- **Programming Languages:** Java, C++, JavaScript, Python, SQL
- **Cloud, Databases & Tools:** MongoDB, Docker, Git/GitHub, Postman, REST APIs, JWT/OAuth, CI/CD (GitHub Actions), Vercel
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Experience

Capillary Technologies India Limited **Sep 2026 – Present**
Software Development Engineer Intern *Onsite, Bangalore*
– Building client-specific web and application features on top of Capillary's products, including custom AI workflows, API integrations, and automation, in collaboration with engineering and Professional Services teams.

Kumar Infotech **May 2025 – Aug 2025**
Website Developer Intern *Hybrid, Mumbai*
– Built web application features in React.js, Next.js, and Node.js, integrating REST APIs and reusable components, and shipped customer-facing updates alongside the engineering team in an agile workflow.

Key Projects

UnderwriteAI – Full-Stack ML Risk Assessment Platform **Apr 2026 – Jul 2026**
– Built a full-stack platform on Next.js and MongoDB powering a stacked-ensemble ML pipeline (Random Forest, Gradient Boosting, Ridge meta-model via 5-fold CV) that generates risk scores from **15+ engineered features** across **6 data sources**.
– Added a RAG-powered LLM explanation layer (Llama 3.3 70B via Groq) using LangChain and LangGraph to make risk decisions explainable and auditable, with fairness checks built in, plus an OCR pipeline supporting **8 document types**.
– **Stack:** Next.js, NextAuth, MongoDB, PyTorch, XGBoost, Random Forest, LangChain, LangGraph, RAG, Groq API.

Automated University Timetable Scheduler | ***SIH 2025 National Winner*** **Sep 2025 – Dec 2025**
– Built a full-stack, role-based web app (Next.js 15, React 18, Flask) with a **Google OR-Tools** optimization engine to generate clash-free timetables for **BSc, B.Ed, M.Ed, ITEP & FY** programs, accounting for faculty availability and room allocation.
– Integrated the **Google Gemini API** into an Institute Coordinator → Department Coordinator workflow that generates **3 timetable options** per department with Excel/PDF export, cutting manual scheduling effort by nearly **70%**.
– **Stack:** Next.js 15, React 18, Tailwind v4, Flask, Google OR-Tools, Google Gemini, MongoDB, NextAuth, openpyxl, jsPDF, pdf-parse.

ThreatLens AI – Cybersecurity NLP Framework **Feb 2026 – April 2026**
– Trained and evaluated multiple NLP models on **126K+ NVD CVE records** to predict vulnerability severity and CWE category, benchmarking SecureBERT, BERT, CNN, LSTM, and GRU with time-based data splits.
– Designed a shared-model architecture for both prediction tasks, improving classification performance by about **8% F1** over separate models, and served predictions through a **React** frontend backed by a **FastAPI** inference service.
– **Stack:** React, PyTorch, Hugging Face Transformers, SecureBERT, BERT, CNN, LSTM, GRU, FastAPI, Scikit-learn, Pandas, NumPy.

Problem Solving & Coding Profiles

- **LeetCode:** Solved **450+** problems across Arrays, Strings, Trees, Graphs, DP, Divide & Conquer, and Greedy.
- **CodeChef: 2-Star** rated competitive programmer; regular participant in Starters contests.
